

uPVC Double Glazed Awning Windows

Handle Operated

Winder Operated

* Optional retractable flyscreen

uPVC Awning windows hinge from the top and open outward, allowing you to ventilate your property even while it's lightly raining. These windows are a popular choice for properties with limited space, and with our thin yet durable uPVC frames you can maximise visibility and natural light in your home. When closed, the single or double glazed sashes lock tightly to protect interiors against the elements and outside noise. Our double glazed awning windows can be installed by themselves or with fixed panes to suit your property's space and façade, and are available in

a variety of colours and sizes. Also please note that the double glazed awning windows we provide drop from the top of the frame allowing for hot air/smells escape the premises and new fresh air come in from the bottom of the frame. This eliminates issues with ventilation flows previously associated with awning windows. The Integra Windows team can recommend ideal uPVC double glazed windows and configurations for your property to ensure a balanced aesthetic. Arrange your free quote to explore the entire range of options.

FEATURES

Benefits of double glazed insulation

Our double glazed windows and doors are engineered to protect you and your family from Sydney's hot summers and cold winters. With energy prices soaring, there is no better time to invest in thermally efficient systems. Integra double glazed windows and doors employ the latest technology to thermally maintain and create an effective insulating layer. This ensures a comfortable and temperature-controlled indoor space year-round.

Our systems are of the highest quality and affordable. With the systems engineered in Germany, you can expect strength. The designs are European to give your home and office inspiring sophistication. All products are produced in our local Sydney manufacturing site to bring you durable products that you can trust

Awning window custom configurations

Our state of the art manufacturing facility in Sydney provides the flexibility for custom configurations to suit the individual requirements of our customers.

Awning window uPVC exterior colour options

When building or renovating, selecting the colour scheme for your home's interior and exterior can be one of the most exciting decisions you make, it can also be one of the most stressful! You naturally select the colours for your roof, walls, flooring, and more, but it is very important to consider your window and door colours as these are a

long term investment that can blend with your home or become a feature in the design.

Our premium uPVC windows and doors are available in nine on trend frame colours. Apart from frame colours you may be surprised to learn that you can also choose different glass options and handles.

Awning window uPVC dual colour options

Dual colour windows have different colours combinations for the internal and external parts of the frame. Many homeowners prefer them because they offer additional

customisation by allowing them to create a different look for the inside and outside of their home.

Awning window glass options

When choosing your windows, we always think about the style, colour and hardware to match. What we don't usually think about is the type of glass used.

There are various glass options to choose from, and all come with their own unique features and benefits.

CLEAR

FROSTED

BLACK PRIVACY

LOW-E

CLEAR

Clear is the basic glass most commonly used in windows and doors. It provides high transmission of light.

WHITE & BLACK PRIVACY

Ensures privacy by making it harder to see through the glass. This type of glass is commonly used for bathroom windows.

LOW-E

Low-E, or low-emissivity, is designed to minimize the amount of infrared and ultraviolet light that comes through your glass, increasing the thermal efficiency providing a more consistent interior home environment.
