

# INTEGRA WINDOWS

## uPVC Double Glazed Bifold Doors

uPVC Bifold doors are one of the easiest ways to instantly open up your living space to the great outdoors. You can quickly convert your dining room or living area into a patio by folding the doors neatly to one side on their smooth roller systems. These uPVC door frames are fire resistant, low in maintenance and 100% recyclable, and their streamlined design suits any style of property in a range of colours. You may also choose to include a single hinged door on one end of the bifold panes to make it even easier to enter, exit and lock up your home.

Our uPVC bifold door solutions offer excellent energy efficiency and noise reduction properties. Contact Integra Windows today to explore the options for uPVC bifold doors for your property.

## Bifold Doors - high performance solutions

## Benefits of double glazed insulation

Our double glazed windows and doors are engineered to protect you and your family from Sydney's hot summers and cold winters. With energy prices soaring, there is no better time to invest in thermally efficient systems. Integra double glazed windows and doors employ the latest technology to thermally maintain and create an effective insulating layer. This ensures a comfortable and temperature-controlled indoor space year-round.

Our systems are of the highest quality and affordable. With the systems engineered in Germany, you can expect strength. The designs are European to give your home and office inspiring sophistication. All products are produced in our local Sydney manufacturing site to bring you durable products that you can trust

## Bifold Door uPVC exterior colour options

When building or renovating, selecting the colour scheme for your home's interior and exterior can be one of the most exciting decisions you make, it can also be one of the most stressful! You naturally select the colours for your roof, walls, flooring, and more, but it is very important to consider your window and door colours as these are a

long term investment that can blend with your home or become a feature in the design.

Our premium uPVC windows and doors are available in nine on trend frame colours. Apart from frame colours you may be surprised to learn that you can also choose different glass options and handles.

WHITE

PREMIUM WHITE

CREAM

SILVER

NUT TREE

GOLDEN OAK

ALUMINIUM GREY

ANTHRACITE GREY

ASH BLACK

## Bifold door uPVC dual colour options

Dual colour doors have different colours combinations for the internal and external parts of the frame. Many homeowners prefer them because they offer additional

customisation by allowing them to create a different look for the inside and outside of their home.

## Bifold door glass options

When choosing your doors, we always think about the style, colour and hardware to match. What we don't usually think about is the type of glass used.

There are various glass options to choose from, and all come with their own unique features and benefits.

CLEAR

FROSTED

BLACK PRIVACY

LOW-E

### CLEAR

Clear is the basic glass most commonly used in windows and doors. It provides high transmission of light.

### FROSTED & BLACK PRIVACY

Ensures privacy by making it harder to see through the glass. This type of glass is commonly used for bathroom windows and doors

### LOW-E

Low-E, or low-emissivity, is designed to minimize the amount of infrared and ultraviolet light that comes through your glass, increasing the thermal efficiency providing a more consistent interior home environment.
