

## uPVC Double Glazed Casement Windows

Winder Operated

Handle Operated

\* Optional retractable flyscreen

Our uPVC casement windows are attached to its frame by hinges at the side held open using a casement stay. They are one of our top selling doubled glazed windows as they are very easy to use even in the most obscure positions. Using thin uPVC frames, they enhance the look and feel of your home or office by bringing you a greater connection with the outdoors. They allow for a space of comfort and work for both modern and period properties. Our casement has an option of pivoting to the centre which provides an easy way of cleaning the windows from the inside

Double glazed casement windows come with everything you would expect in terms of energy efficiency and noise reduction. Watch your gas and electricity bills drop while you sit in a quiet and peaceful environment.

We offer different types of double glazed casement windows to suit different needs. Looking for the right type of uPVC casement windows for your property? Contact Integra Windows today for a consultation with one of our experienced representatives.

## Casement windows - high performance solutions

## Benefits of double glazed insulation

Our double glazed windows and doors are engineered to protect you and your family from Sydney's hot summers and cold winters. With energy prices soaring, there is no better time to invest in thermally efficient systems. Integra double glazed windows and doors employ the latest technology to thermally maintain and create an effective insulating layer. This ensures a comfortable and temperature-controlled indoor space year-round.

Our systems are of the highest quality and affordable. With the systems engineered in Germany, you can expect strength. The designs are European to give your home and office inspiring sophistication. All products are produced in our local Sydney manufacturing site to bring you durable products that you can trust

## Casement window custom configurations

Our state of the art manufacturing facility in Sydney provides the flexibility for custom configurations to suit the individual requirements of our customers.

## Casement window uPVC exterior colour options

When building or renovating, selecting the colour scheme for your home's interior and exterior can be one of the most exciting decisions you make, it can also be one of the most stressful! You naturally select the colours for your roof, walls, flooring, and more, but it is very important to consider your window and door colours as these are a

long term investment that can blend with your home or become a feature in the design.

Our premium uPVC windows and doors are available in nine on trend frame colours. Apart from frame colours you may be surprised to learn that you can also choose different glass options and handles.

WHITE

PREMIUM WHITE

CREAM

SILVER

NUT TREE

ALUMINIUM GREY

ANTHRACITE GREY

ASH BLACK

## Casement window uPVC dual colour options

Dual colour windows have different colours combinations for the internal and external parts of the frame. Many homeowners prefer them because they offer additional

customisation by allowing them to create a different look for the inside and outside of their home.

## Casement window glass options

When choosing your windows, we always think about the style, colour and hardware to match. What we don't usually think about is the type of glass used.

There are various glass options to choose from, and all come with their own unique features and benefits.

CLEAR

FROSTED

BLACK PRIVACY

LOW-E

### CLEAR

Clear is the basic glass most commonly used in windows and doors. It provides high transmission of light.

### WHITE & BLACK PRIVACY

Ensures privacy by making it harder to see through the glass. This type of glass is commonly used for bathroom windows

### LOW-E

Low-E, or low-emissivity, is designed to minimize the amount of infrared and ultraviolet light that comes through your glass, increasing the thermal efficiency providing a more consistent interior home environment.
