

INTEGRA WINDOWS

uPVC Double Glazed Hinged Doors

*Colonial bars (inside DGU)

Double glazed entry doors provide perfect visibility to the outside without sacrificing comfort. Our uPVC entry door frames look stunning in your choice of colour, whether used for your front door or elsewhere in the building. There is a range of hardware available for our uPVC entry doors including 180-degree opening hinges, while your choice of flyscreen can easily be fitted to the outside frame. With outstanding noise and heat insulation properties and little to no maintenance required, these make an ideal choice for a light-filled home.

The uPVC entry doors we are able to offer also come with solid core panels to create a design feature and provide complete privacy for the residence

You might prefer a single hinged glass door, a door with matching sidelights or French doors that sit perfectly flush. Call or email the Integra Windows team today to arrange a free quote for your home.

Hinged Doors - high performance solutions

Benefits of double glazed insulation

Our double glazed windows and doors are engineered to protect you and your family from Sydney's hot summers and cold winters. With energy prices soaring, there is no better time to invest in thermally efficient systems. Integra double glazed vs and doors employ the latest technology to thermally maintain and create an effective insulating layer. This ensures a comfortable and temperature-controlled indoor space year-round.

Our systems are of the highest quality and affordable. With the systems engineered in Germany, you can expect strength. The designs are European to give your home and office inspiring sophistication. All products are produced in our local Sydney manufacturing site to bring you durable products that you can trust

Hinged door custom configurations

Our state of the art manufacturing facility in Sydney provides the flexibility for custom configurations to suit the individual requirements of our customers.

Hinged Door uPVC exterior colour options

When building or renovating, selecting the colour scheme for your home's interior and exterior can be one of the most exciting decisions you make, it can also be one of the most stressful! You naturally select the colours for your roof, walls, flooring, and more, but it is very important to consider your window and door colours as these are a

long term investment that can blend with your home or become a feature in the design.

Our premium uPVC windows and doors are available in nine on trend frame colours. Apart from frame colours you may be surprised to learn that you can also choose different glass options and handles.

Hinged door glass options

When choosing your doors, we always think about the style, colour and hardware to match. What we don't usually think about is the type of glass used.

There are various glass options to choose from, and all come with their own unique features and benefits.

CLEAR

FROSTED

BLACK PRIVACY

LOW-E

CLEAR

Clear is the basic glass most commonly used in windows and doors. It provides high transmission of light.

FROSTED & BLACK PRIVACY

Ensures privacy by making it harder to see through the glass. This type of glass is commonly used for bathroom windows and doors.

LOW-E

Low-E, or low-emissivity, is designed to minimize the amount of infrared and ultraviolet light that comes through your glass, increasing the thermal efficiency providing a more consistent interior home environment.
