uPVC Double Glazed Sliding Doors

Sliding doors are a timeless design, and our modern uPVC sliding doors provide easy motion in an incredibly durable and attractive finish. You might choose two panels with one fixed door, three panels that slide to one side of the door frame, or four panels that open from the middle.

There's the option of a double slider door, which allows both doors to be moved. With flexible design options and excellent fire and weather resistance, these uPVC glazed doors will suit all architectural spaces.

FEATURES

- ✓ Two, three or four panel configurations
- ✓ Smooth and easy door movement
- ✓ Fire, weather and fade resistance
- ✓ Very little maintenance required
- ✓ 30+ years of guaranteed performance

BENEFITS

- ✓ Create easy cross-ventilation throughout your home
- ✓ Cut down on your heating, cooling and lighting costs
- ✓ Open your doors wide to let fresh air in or to move furniture
- ✓ Insulate against external noise without restricting visibility

Sliding Doors - high performance solutions

Benefits of double glazed insulation

Our double glazed windows and doors are engineered to protect you and your family from Sydney's hot summers and cold winters. With energy prices soaring, there is no better time to invest in thermally efficient systems. Integra double glazed vs and doors employ the latest technology to thermally maintain and create an effective insulating layer. This ensures a comfortable and temperature-controlled indoor space year-round.

Our systems are of the highest quality and affordable. With the systems engineered in Germany, you can expect strength. The designs are European to give your home and office inspiring sophistication. All products are produced in our local Sydney manufacturing site to bring you durable products that you can trust

Sliding door custom configurations

Our state of the art manufacturing facility in Sydney provides the flexibility for custom configurations to suit the individual requirements of our customers.

Sliding Door uPVC exterior colour options

When building or renovating, selecting the colour scheme for your home's interior and exterior can be one of the most exciting decisions you make, it can also be one of the most stressful! You naturally select the colours for your roof, walls, flooring, and more, but it is very important to consider your window and door colours as these are a

long term investment that can blend with your home or become a feature in the design.

Our premium uPVC windows and doors are available in nine on trend frame colours. Apart from frame colours you may be surprised to learn that you can also choose different glass options and handles.

Sliding door glass options

When choosing your doors, we always think about the style, colour and hardware to match. What we don't usually think about is the type of glass used.

There are various glass options to choose from, and all come with their own unique features and benefits.

CLEAR

FROSTED

BLACK PRIVACY

LOW-E

CLEAR

Clear is the basic glass most commonly used in windows and doors. It provides high transmission of light.

FROSTED & BLACK PRIVACY

Ensures privacy by making it harder to see through the glass. This type of glass is commonly used for bathroom windows and doors

LOW-E

Low-E, or low-emissivity, is designed to minimize the amount of infrared and ultraviolet light that comes through your glass, increasing the thermal efficiency providing a more consistent interior home environment.
