

INTEGRA WINDOWS

uPVC Double Glazed Sliding Windows

If you need a window that's wider than it is high, then consider installing double glazed sliding windows. The sliding style is ideal for spaces where you won't have room for sashes that move inwards or outwards. Our sophisticated uPVC sliding windows look elegant even with flyscreens and can practically eliminate road noise from outside. Choose from a single sliding sash next to a fixed pane, or two sliding sashes that can move independently

of one another to suit your property. Our double glazed sliding windows can be manufactured to your specifications in a number of colours and realistic timber looks.

uPVC sliding windows are fire and weather resistant and their streamlined design makes them ideal for all property types. Speak with Integra Windows today to request your free quote.

FEATURES

- ✓ Weather, fire and fade resistance
- ✓ Suitable for larger windows
- ✓ Long lasting quality with little maintenance
- ✓ Flyscreens can also be installed

BENEFITS

- ✓ Reduce your energy bills with double glazed sashes and natural light
- ✓ Effortlessly open and close windows, even in hard to reach places
- ✓ Open windows wide by sliding double sashes together
- ✓ Carry out minimal maintenance due to fewer moving parts
- ✓ Open as little or as much as you prefer depending on the weather

Benefits of double glazed insulation

Our double glazed windows and doors are engineered to protect you and your family from Sydney's hot summers and cold winters. With energy prices soaring, there is no better time to invest in thermally efficient systems. Integra double glazed windows and doors employ the latest technology to thermally maintain and create an effective insulating layer. This ensures a comfortable and temperature-controlled indoor space year-round.

Our systems are of the highest quality and affordable. With the systems engineered in Germany, you can expect strength. The designs are European to give your home and office inspiring sophistication. All products are produced in our local Sydney manufacturing site to bring you durable products that you can trust

Sliding window custom configurations

Our state of the art manufacturing facility in Sydney provides the flexibility for custom configurations to suit the individual requirements of our customers.

Sliding window uPVC colour options

When building or renovating, selecting the colour scheme for your home's interior and exterior can be one of the most exciting decisions you make, it can also be one of the most stressful! You naturally select the colours for your roof, walls, flooring, and more, but it is very important to consider your window and door colours as these are a

long term investment that can blend with your home or become a feature in the design.

Our premium uPVC windows and doors are available in nine on trend frame colours. Apart from frame colours you may be surprised to learn that you can also choose different glass options and handles.

Casement window uPVC dual colour options

Dual colour windows have different colours combinations for the internal and external parts of the frame. Many homeowners prefer them because they offer additional

customisation by allowing them to create a different look for the inside and outside of their home.

Sliding window glass options

When choosing your windows, we always think about the style, colour and hardware to match. What we don't usually think about is the type of glass used.

There are various glass options to choose from, and all come with their own unique features and benefits.

CLEAR

FROST

BLACK PRIVACY

LOW-E

CLEAR

Clear is the basic glass most commonly used in windows and doors. It provides high transmission of light.

WHITE & BLACK PRIVACY

Ensures privacy by making it harder to see through the glass. This type of glass is commonly used for bathroom windows

LOW-E

Low-E, or low-emissivity, is designed to minimize the amount of infrared and ultraviolet light that comes through your glass, increasing the thermal efficiency providing a more consistent interior home environment.
